

CAPABILITY STATEMENT

Company Overview

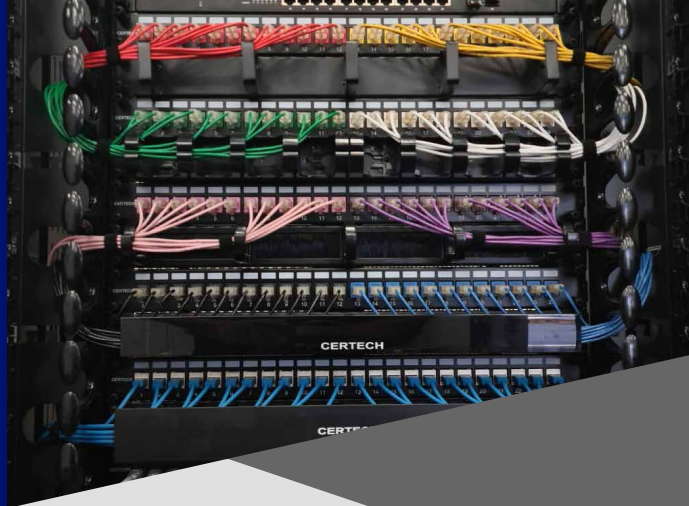

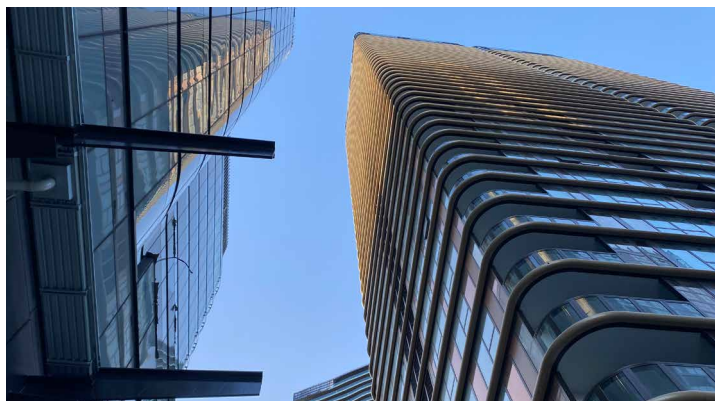

CERTECH is an Australian manufacturer driving the future of connectivity infrastructure. We deliver high-performance structured cabling, AV, and networking solutions built for commercial, education, healthcare, hospitality, datacentre, and infrastructure environments.

We work with builders, integrators, and facilities teams to deliver scalable systems that power today's technology, and are ready for whatever comes next. No compromises. Just smart, reliable connectivity that performs.

Our Mission

We empower our partners with smart, sustainable connectivity solutions that perform, comply, and deliver long-term value. Every solution is built to meet Australian Standards, simplify deployment, and drive real results.

These outcomes are made possible by the people who bring our solutions to life. Whether you're an architect, engineer, network designer, certified installer, reseller, master distributor, or end-customer, we equip you with the tools, support, and certainty to deliver with confidence and precision.

CERTECH ESG Commitment

At CERTECH, sustainability isn't a feature, it is the foundation of everything we do. We engineer low-impact, future-ready IT infrastructure that elevates the performance, safety, and lifespan of built environments. Our focus is clear: wellbeing, adaptability, and long-term value for the communities our systems support.

Our designs cut waste and streamline installation. We've removed single-use plastics from our packaging, replacing them with recyclable, reduced-material cardboard wherever possible, and we share this approach to accelerate change across the industry. As an APCO member, we actively contribute to national packaging recovery targets. Our GECA-certified, Low Smoke Zero Halogen (LSZH), PVC-free cable proves our commitment to safer, healthier materials without compromise.

We stand for safe, inclusive workplaces, on-site and in the office. We embrace diversity across culture, gender, age, ability, and thought, because real innovation demands a range of perspectives. Through transparent governance and accountable supplier partnerships, we're not just supporting sustainability, we are leading it, step by step.

Our Solutions

Enterprise IT & Data Centre Solutions

- Structured Cabling Systems: Copper and fibre solutions for high bandwidth network requirements, from Gigabit ethernet to 100Gbps+ on Singlemode fibre.
- AV over IP Integration: High-bandwidth AV systems with low-latency structured cabling.
- Racks, Cabinets & Cable Management: Space-efficient layouts with proper airflow and accessibility.
- Power Management: Intelligent PDU deployment.

Industrial & Harsh Environment Infrastructure

- Industrial Ethernet & OT Networks: Compliant cabling for robust machine communication.
- Harsh Environment Enclosures: IP45 – IP65 Industrial enclosures designed for Australia's harsh conditions.

OEM & Solutions Engineering

- Engineered solutions to meet client specifications. Designed in Australia; manufactured to Australian standards, conditions, and market needs.
- Technical Pre-Sale and Post-Sale Support. Australian based support and expertise.

Professional Services & Lifecycle Support

- Design & Specification Consulting. Engineering support for architects, network designers, engineers and project managers.
- Certified Installer Training & Support. Face to face training with Australia's pre-eminent structured cabling experts.

Why Choose CERTECH?

Trusted by Industry Leaders: Supplying leading QSR, hospitality, education, and commercial brands across Australia.

End-to-End Confidence: Backed by a 25-Year System Performance Warranty, independently verified with NATA accreditation.

Smart, Future-Ready Infrastructure: Supporting evolving technologies including PoE, smart systems, and segmented networks.

OEM: We deliver reliable, high-quality OEM manufacturing, tailored to your specs and backed by strict quality control.

Sustainability First: GECA-approved, PVC-free, LSZH products designed to meet Green Star and NABERS targets.

Speed and Flexibility: Australian-held stock and responsive local support for fast turnaround and minimal disruption.

Solutions That Fit: We genuinely care about getting it right, aligning your project needs with Australian Standards compliance and technical best practice.

Built for Partnership: We work hand-in-hand with End-Customers, Certified Installers, Master Distributors and education providers to streamline delivery, minimise risk, and ensure long-term value, delivered on time and within budget.
